Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "said open body" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mueller (US 5,008,066) in view of Mason, Jr. (US 3,235,117) and Petit (US 6,202,887).

Mueller teaches a container having a container body and covering element unitarily formed as a single piece, the covering element having a depending sealing rib. Mueller does not teach a bi-injected gasket.

Mason, Jr. teaches it is known to provide a depending sealing rib on the covering element or a separate gasket on the covering element for sealing the container neck.

Petit teaches it is known to provide a gasket on covering element by bi-injecting two materials to create the cover and a gasket thereon.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the substitute a separate gasket for the sealing rim as taught by Mason, Jr. as an alternative structure selected for its desirability and to bi-inject a first material for forming the covering element an container body and a second material for forming the gasket on the

Art Unit: 3727

covering element as taught by Petit. Doing so provides an alternative container structure selected for its desirable characteristics.

Regarding claims 9 and 10, the container defines a jar, tube or vial to the degree set forth in the claims.

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art as applied to claim 11 above, and further in view of Mueller (US 5,927,566).

Mueller '066 as modified teaches the claimed method of manufacturing except for the container body having an open end opposite the covering element.

Mueller '566 teaches it is known to manufacture a container from a perform having an open end opposite the covering element, the body formed by blow molding through the open body.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to the teaching of an open end opposite the covering element. Doing so provides for bottom-filling the container.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3727

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

8. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number (703) 305-3579 on the date shown below:

Typed or printed name of person signing this certificate
